

## Gaza: A Graveyard for Children, a Graveyard for Human Rights.

*Above is an image from the Nakba of 1947-49 (left) and next to it one from 2023, as people flee northern Gaza for “safety” in the south. They found no safety, just more relentless bombing and targeting of schools, hospitals, masjids and churches – no safe place in Gaza today.*

Politicians are beginning to wring their hands and lament the suffering in Gaza, calling for “restraint” by Israel.

As of Nov 14<sup>th</sup>, 11,000 Gazans have been slaughtered, 5,000 of them children: how many more must die before our “leaders” acknowledge Israel’s criminality?

We will not forget that Sunak told Netanyahu *“I hope you win!”* and Starmer said he thought Israel had *“the right”* to cut off supplies of food, water, electricity and medicines from Gaza.

We won’t forget that the UK aided, abetted and enabled this genocide by providing diplomatic cover, military intelligence and weapons via the arms trade.

We will never forget that this wave of genocide is “just” the latest phase in Israel’s 75 year project to ethnically cleanse Palestine and install their own racist and supremacist regime from the river to the sea.
